

# A PEOPLES' STORY IN DANCE

## Juan Antonio Urbeltz

**A audio-visual lecture by Europe's leading Basque Dance expert  
In Spanish & Basque with English subtitles on Powerpoint**

Juan Antonio Urbeltz is an acknowledged leading voice in the world of Basque dance and culture. He has played a pivotal--if not the central role--in a virtual revolution in the world of Basque dance: how it is prepared, portrayed, presented and understood.

His free presentation will cover defining moments of his career from his early days of dancing to his many publications, an elaboration of his theory as to the origins of Basque dance and the ongoing role played by dance in Basque culture. Joining him will be his wife Marian and son Mikel as musicians.

It is a special opportunity for all those interested in Basque dance specifically and Basque culture generally to hear from one of the best, about how a people's story can be told through their dances.
